

# The SaaS way to manage your IT

SAManage revolutionizes the way IT is managed today, empowering you to better control the assets you own and deliver a better IT service to your users. SAManage is simple to use, yet powerful enough to solve even the most sophisticated IT management needs. **Its IT management software like you have never seen before.**

## ASSET MANAGEMENT

Manage the entire IT asset lifecycle, from acquisition to disposal. You'll know exactly what assets you have, how they're configured, and where they are physically located.

## IT SERVICE DESK

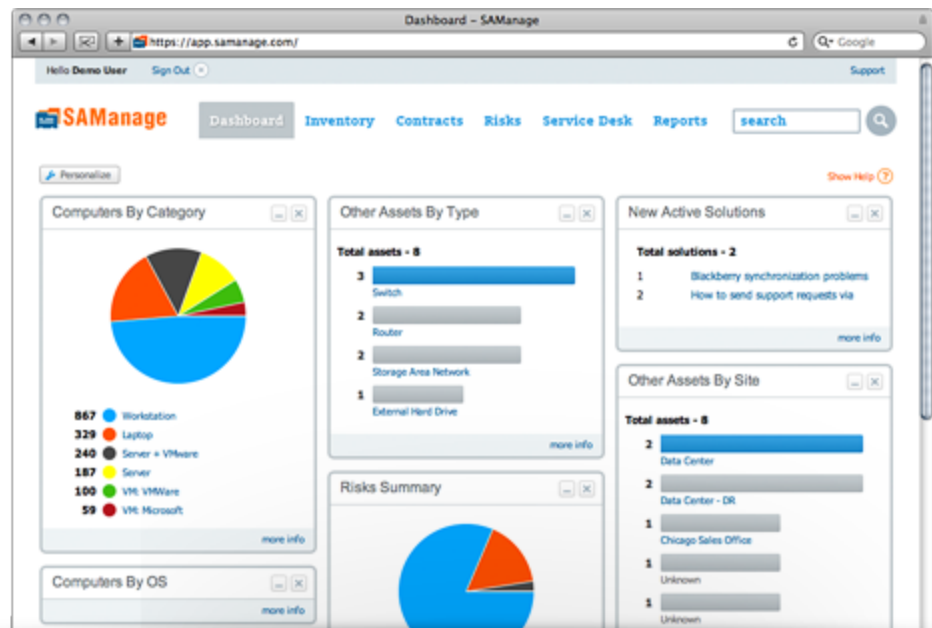

Deliver better IT service to your users with ITIL-based enterprise IT Service Desk. Manage incidents, problems, changes, and releases, with integrated IT Service Catalog and user portal.

## IT CONTRACTS

Organize your financial assets; keep track of software licenses, leases maintenance contracts, purchases, and vendors.

## RISKS & LICENSE COMPLIANCE

Detect threats to your assets, validate software license compliance standing at any time.

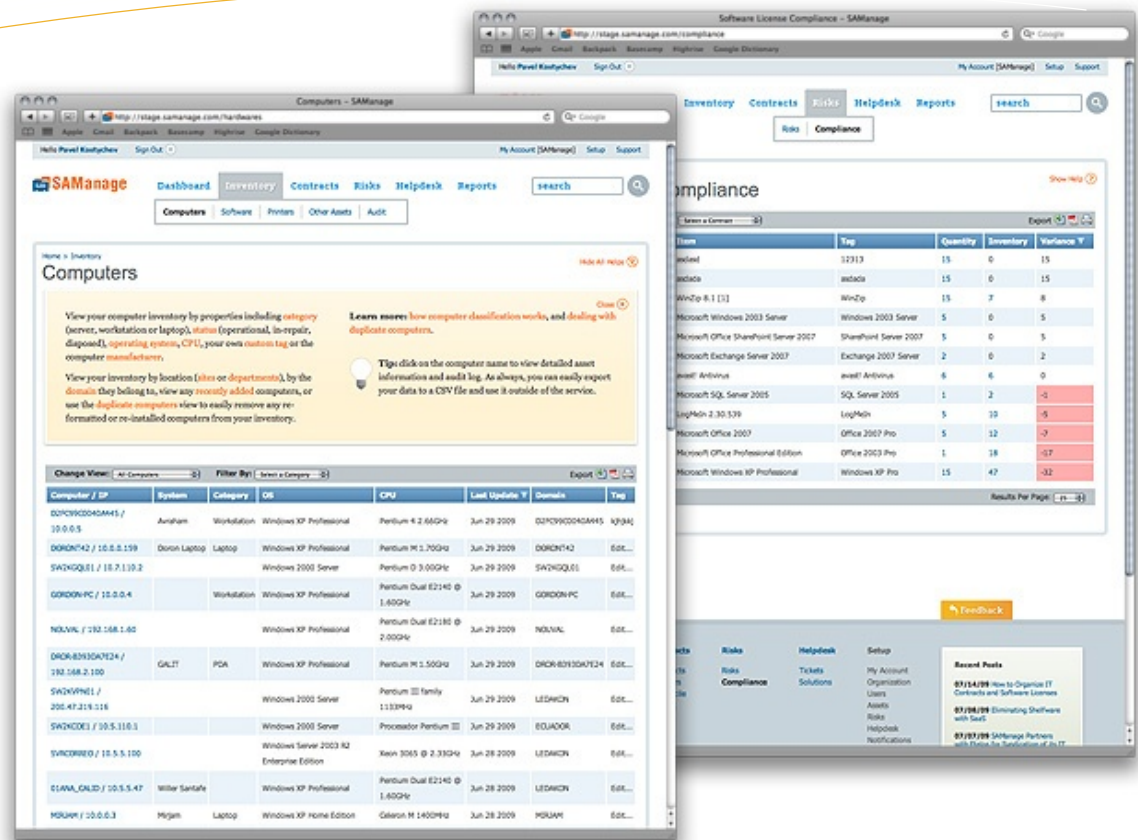

## IT Management software for a new era

Enterprise software doesn't have to be expensive and complicated. That's why we built our service to be simple to use, **visually stunning**, and effective. With SAManage, you get enterprise software tools guaranteed to help you succeed. **Delivered via SaaS**, SAManage facilitates rapid rollout of an easy to use, enterprise-grade IT asset and service management solution that reduces costs, improves control, and provides greater visibility into your assets.

## The SaaS advantage

SAManage is designed from the ground up as a modern, integrated Web application. Delivered via SaaS, SAManage requires no hardware or software, freeing you from ongoing administration and upgrades, so you can focus on other critical projects. We provide new features and capabilities frequently, with no effort on your part, and you can be up and running in a matter of hours, not weeks.

# Gain visibility and control, quickly

*“SAManage was very easy to deploy and use. We were able to start using the service and get visibility into our hardware and software in no time.”*

Miki Shvo  
Dassault Systèmes

*“SAManage makes my job much easier. I expect it will be saving me as much as two days a week.”*

George Abell  
EF&I Services

## Key Business Benefits

- Reduce IT costs by knowing which IT assets you own and use
- Deliver better IT service to your users and improve the way you manage infrastructure changes.
- Easily access IT information online, collaborate with your team and your users, and make better decisions.
- Satisfy IT audit requirements and verify license compliance at any point in time.
- SaaS – no hardware or software required, and no upgrades to manage.

## Key Features

- **IT asset management** – track all IT assets you own from the day they are put to use to the day they are disposed. Know where they are, who is using them, and what's the asset configuration.
- **IT service management** – ITIL based IT service desk, with self-service portal, IT service catalog and incident, problem, change, and release management.
- IT contract management, risk detection and license compliance gap analysis.

**SAManage**
